

The Norm Engineering Swing Hoe increases the flexibility of your skid steer loader machine by combining the properties of a trenching attachment and an excavator into one attachment.

- » 300mm bucket supplied with Swing Hoe as standard (other bucket sizes available)
- » Maximum slew angle 70° each way
- » Maximum digging depth approximately 2 metres
- » Suitable for mini loaders & skid steer loaders

With a **70° swing each way**, the slew or "swing" design eliminates the need to move the machine to empty the bucket which is ideal when working on lawns or other surfaces that can be damaged by skid steer and track machine movement.
